

# Your **SECRET WEAPON** for **CANNABIS + HEMP** **PROCESSING + EXTRACTION**

**It's a time of creativity and innovation in cannabis and hemp oil extraction—and this requires not only fresh ideas, but also a history of expertise.**

Leveraging our 30-year track record, we actualize concepts using innovative and creative engineering design along with manufacturing principals and know-how. We have an experienced team committed to the cannabis and hemp industries: designers, engineers and craft-focused fabricators. We are ready to pioneer ideas for your business that will sow the seeds of long-term success.

## **WHO WE ARE**

At Verdara Technologies, we design, engineer and manufacture cannabis and hemp extraction processing equipment.

## **WHAT WE DO**

### **Services**

- Engineering & Design
- Prototype Validation
- Welding & Fabrication
- ASME Section VIII Div. 1, "U" & "UM" Certification, CRN & PED Compliance
- Certified Pressure Vessel Repair
- Scalable Production
- Turnkey Solutions
- Financing Options Available

### **Solutions**

- Pressure & Storage Vessels
- Distillation Equipment
- Jacketed Equipment
- Solvent Tanks
- Molecular Stills & WFE
- Modular Process Skids
- Automation
- Other Extraction Equipment Products

**INNOVATE + ENGINEER + ACTUALIZE**

**VERDARATECH.COM**

Verdara Technologies is built on 30+ years of process engineering and fabrication expertise gained from our association with AET Inc. (aetinc.com). This competitive advantage allows us to introduce innovative process and extraction solutions that consistently improve your yield, throughput and equipment uptime, while maintaining the highest quality standards.

## **LET'S START A CONVERSATION**

How can our team's expertise and creativity help make your cannabis and hemp extraction ideas a reality?
